

Following corrections on the website and a conversation with the Planning Officer clarifying the proposed extent and design of the fenestration, the Parish Council comments are:

1. The Council has no objection to the change from commercial to residential in the use of the building.
2. The Old Stable is a building of some architectural and historic interest. It is understood that only existing materials and timber will be used for the conversion externally.
3. There is concern that the applicant must understand that the proposal cannot be amended, if approved, without further formal permission.
